About Us

Dino Design Park is a company founded with the aim of producing design elements.

Driven by a strong spirit of innovation and influenced by the rich tradition of Emilia Romagna | Italy, it combines the study of cutting-edge technologies with artisanal expertise, crafting unique solutions that embody quality, elegance, and functionality.

Designing starting from an insatiable pursuit of beauty and functionality is the goal behind our work.

The Universal Modular System

STOCK

Available modules:

M2

Wash + Cutting Board + Storage

M4

Cooler Bag

M1

Cooking + Storage

M3

Storage

STOCK is the first universal modular system with a patented design to turn cars and vans into campers. Ultra-light, fully adjustable, and completely self-contained, it installs with zero body drilling and includes top-tier premium accessories.

USE AND SPECIFICATIONS:

- **Instant Cooking:** Cooktop compatible with standard disposable gas cartridges.
- **Water System:** 5.5 L food-grade tank (expandable to 11 L), gravity-fed tap, and USB-C rechargeable shower pump.
- **Oak Top & Storage:** Pull-out solid oak worktop/tray with dedicated tableware compartment.
- **Build & Fit:** Water-resistant solid wood, ergonomic handles, and height-adjustable feet for in-trunk or ground setup.

*Photos are for illustration only.
Actual technical specification will depend on the type of vehicle.

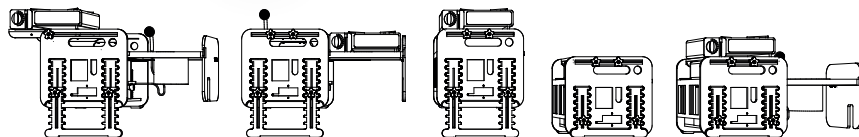

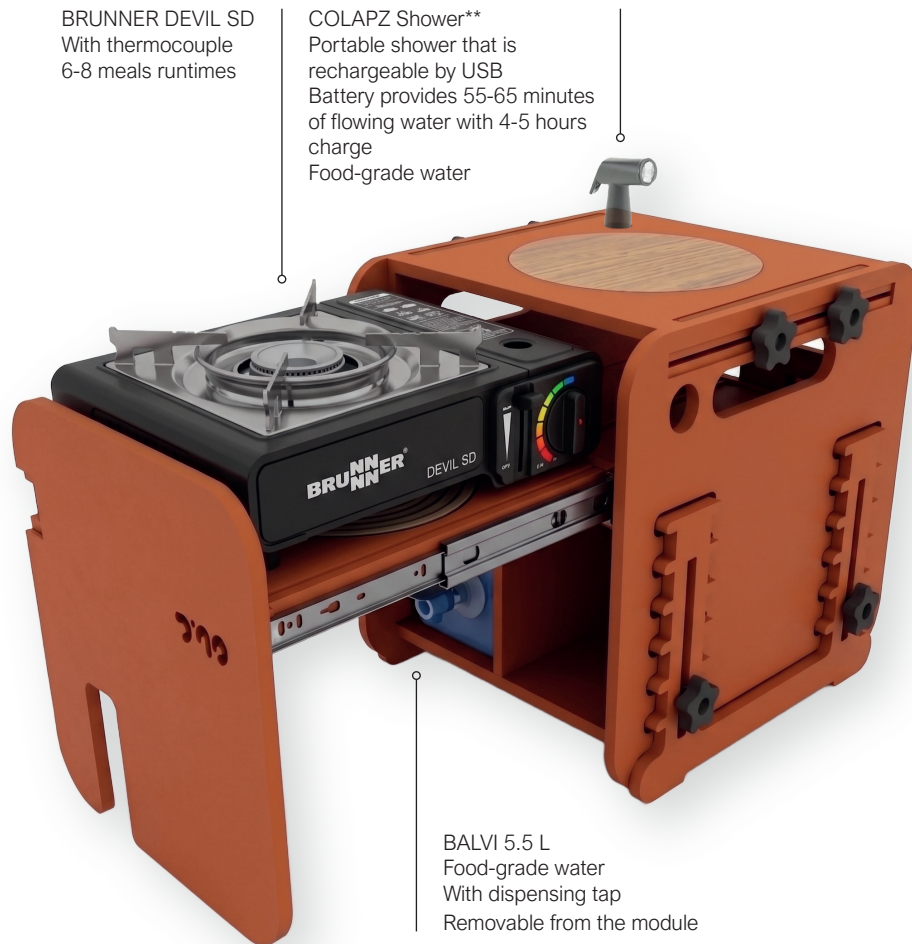

“Make sure you
eat”! my mother
always says.

That's why I created STOCK.

The Smart Cooking Unit

MINI

*Photos are for illustration only.

**Accessories not included

Actual technical specification will depend on the type of vehicle.

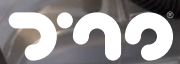

MINI packs all your adventure essentials into just 40 cm.

Engineered as a standalone, ready-to-use unit, it requires no dedicated installations or structural vehicle modifications.

SUSTAINABLE PRODUCT

A Sustainable, Natural, and Recyclable Product

Made entirely from natural wood, our product embodies sustainability and environmental responsibility. The materials used come from responsible sources and are fully recyclable, helping to reduce environmental impact and promote a circular economy.

At Dino Design Park, we implement policies aimed at energy conservation and the responsible use of resources, ensuring a production process that protects nature without compromising on quality and design. Choosing our products means making an eco-friendly choice without sacrificing aesthetics or functionality.

Sustainability and design can go hand in hand. Discover our collection! Let me know if you'd like any adjustments!
